

## Chris Juhasz

### Field Site Engineer & Project Designer

#### **Education:**

Widener University, 2019 BS Civil Engineering

**Responsibilities/Experience:** A quick learner with a great attitude, Chris immediately stepped in providing civil site inspections ensuring compliance of civil / site improvements on land development projects including storm water management, erosion control, site grading, and associated paving, curb and sidewalk. OSHA-30 certified, Chris came to us from Michael Baker International where he was assigned to the Philadelphia International Airport Pedestrian Enhancement and Arrivals Road Rehabilitation Project as a Civil Associate.

Not shying away from assignments, Chris served a stint as the night shift civil inspector and quickly learned the importance of effective communications as he had to inform the day shift project manager of the nightly progress of the construction crews.

A continuation of that positive attitude, Chris was eager to learn and now assists our design teams with those complex algorithms necessary for storm water management design, and even assisting our Building Codes department with various Property Maintenance or Building Construction inspection assistance.

A former high school 2<sup>nd</sup> team All-State Soccer Goalkeeper, Chris continues to play soccer in addition to spending time with family and friends, and going on hikes with his dog. A continuous learner, he also likes to dabble with AutoCAD in his spare time.
